about

It's amazing what you can make with a team and a table.

Join UGA for its 3rd annual Hackathon!

This year is all about going back to the basics. Come find out what a hackathon is all about!

What exactly is a hackathon?

Hackathons are all about groups of dedicated people coming together at a workspace to create something awesome. The 36 hour hackathon is free and open to anyone.

It includes mentors, free food, video game competitions, social mixers and more. There's even mixers at the event for anyone that still needs to find some teammates!

challenges

In case you aren't the most creative person out there, don't worry because this year we are introducing Challenges!

Challenges are projects in which we have clearly defined the rules and there is a definite end goal. Once completed you can cash them in for prizes.

It's first come first serve, so time is of the essence!
